Profile

Passionate frontend developer who keeps on bringing ideas to life. I enjoy crafting visually appealing, responsive websites and solving challenges with a never-give-up mindset. I approach problems with curiosity and patience, thinking through solutions until I solve them. Always open to learning, I continuously improve my skills to stay ahead in web development and contribute to great projects.

Experience

Frontend Developer (Jul 2024 - Present)

Iceberg Digital (London, UK)

- Develop dynamic, modern websites for estate agents using Nuxt.js and Tailwind CSS.
- Build reusable UI components with a focus on clean design and optimized performance.
- Collaborate closely with the team to enhance user experience and site functionality.

Projects

Quotter

quotterr.netlify.app

A full-stack project built with Vue.js and Node.js, featuring a dynamic front-end and efficient back-end using Express.js. Utilized Axios for async data fetching, MongoDB with Mongoose for storage, and implemented CORS for security.

AnimeFind

animefind.netlify.app

A platform for anime exploration leveraging React's Context API and useReducer for global state management. Fetches data from the Jikan API and incorporates Bootstrap carousels for a visually appealing interface.

Skills

- Nuxt.js, Vue.js, React.js
- JavaScript, Node.js, SQL
- Tailwind CSS, Bootstrap, HTML, CSS
- Git

Languages

- Turkish (Native)
- English (Fluent)

Education

Bachelor of Computer Engineering (English)

Mugla Sitki Kocman University (2022 - 2026)

Relevant coursework: Software Engineering, Database Management, Web Development, Object-Oriented Programming.
